PROFESSIONAL SUMMARY

Frontend-focused developer with 3+ years of experience building and maintaining production web applications using React, Next.js, Angular and Vue. Experienced in developing responsive, accessible and user-focused interfaces, translating product requirements into reusable UI, integrating REST APIs, and improving frontend performance and SEO. Currently responsible for multiple live production platforms as the sole frontend developer at FoodHutz, with hands-on experience collaborating with designers, stakeholders and backend services.

TECHNICAL SKILLS

Frontend: React, Next.js (Pages & App Router), Angular, Vue, JavaScript, TypeScript, Redux, RTK Query, Tailwind CSS, Sass
APIs & Backend: REST APIs, GraphQL, Node.js, Express.js, MongoDB

Cloud & DevOps: AWS, DigitalOcean, Vercel, Git, GitHub, GitLab

Design & Quality: Figma, Postman, Insomnia, responsive design, accessibility, cross-browser compatibility, reusable component architecture, performance optimization, debugging, SEO

CMS & Content: Sanity CMS, Strapi, SEO metadata management, content modeling

PROFESSIONAL EXPERIENCE

FoodHutz — Next.js Developer

London, United Kingdom | January 2025 – Present

- Serve as the sole frontend developer responsible for four production platforms used by customers and restaurant partners, owning user facing features across multiple repositories.
- Build and maintain responsive customer reservation experiences with custom calendar logic, discount handling and mobile-first UX improvements.
- Develop and optimise the OneClick takeaway ordering platform, improving SEO discoverability, page performance and checkout usability.
- Implement vendor dashboard functionality that enables restaurant partners to manage menus, orders and operational data through responsive interfaces.
- Integrate payment, reservation and order-processing APIs, working closely with backend services to deliver business-critical frontend workflows.
- Manage application state with Redux and RTK Query, reducing redundant API calls and improving client-side caching efficiency.
- Maintain reusable component systems and production-ready frontend architecture, with attention to responsive behaviour and cross browser compatibility.
- Integrate Sanity CMS and contribute to Strapi-based content systems to support scalable content management

workflows. Xcursions — Full Stack MERN Developer (Contract)

Lagos, Nigeria | July 2023

- Developed a full-stack web application using Next.js, React, Node.js, Express.js and MongoDB, delivering both user-facing interfaces and supporting APIs.
- Designed reusable frontend components that improved development speed and maintainability.
- Implemented scalable backend APIs and database structures to support application growth and frontend integration.
- Collaborated with designers and stakeholders to improve user experience based on product feedback.

City of David Atlanta (RCCG) — Frontend Developer (Contract)

2024

- Built a responsive and SEO-friendly organisation website using Next.js.
- Implemented an optimised frontend architecture focused on performance and accessibility.

My Event Pod — Frontend Developer (Internship)

Liverpool, United Kingdom | Nov 2019 – May 2020

- Built reusable React and Next.js frontend components for a production event platform.
- Improved application performance and resolved legacy frontend issues.
- Integrated APIs and developed custom hooks for cleaner state management.

EDUCATION

Imo State University, Owerri, Nigeria — Bachelor of Science (B.Sc.)

Frontend Developer | React | Next.js | Angular | AWS
